THE STRANGE WORLD OF AL FRY

****

Edited by Dr. CLINT ENNS, Ph.D.

****

This work is dedicated to the COURAGEOUS FEW, who DARE to search out THEIR OWN TRUTH & BECOME THEMSELVES.....

****

PREFACE:

The following material was gleaned from informal conversations with Alfred B. Glaser, during a 14 year period (from 1968 thru 1982). The notes I took now fill my 3 inch thick journal, which I affectionately call my "Brown Book". While I tried to record his comments as accurately as possible, there are bound to be INADVERTENT distortions of his original comments.

In 1976, Mr. Glaser published his VERY CONDENSED Modern Human Comprehension Courses, which covered the base mechanics of the human being FOR THE FIRST TIME ON THIS PLANET. While "Earth Report" can IN NO WAY substitute for the Comp. Course background & data, it CAN be of value in offering expansion & application ideas... and in broadening one's horizon & potential for Happiness.

SPECIAL THANKS ARE OFFERED TO:

Alfred B. Glaser, without whom this work would not have been possible. He freely gave of himself & his time, and I was never able to ask him a question that he could not answer. Thanks for being there & for caring.

Paul Bunker, a Comp. Mentor, sorted out my "Brown Book" notes, converted them to a readable form, and then typed them up.

Dick & Evelyn Watson let us use their I.B.M. Executive electric typewriter for almost 4 weeks. Also, thanks for the meatloafs, hospitality, and general support....

****

We ask no BELIEF or FAITH from you, nor do we expect for you to blindly accept what is written, within these pages. Accept or Reject what you read, and then APPLY those ideas that ring true FOR YOU. When you APPLY the material in PHYSICAL ACTS, then you will KNOW for YOURSELF.

****

*****

May you live in Pleasure & Affection,
Al Fry

WHERE CAN I FIND RECORDS TO CONFIRM THE EVENTS YOU TELL OF ?

With the burning of the great library at Alexandria, a great portion of the recent history of the world was destroyed. Aside from a world wide collection of somewhat obscure material, there is the easily accessible works of Herodotus. According to this Jewish historian, the Egyptian priests kept a very precise record of events for 341 generations. With three generations equal to 100 years, that means a full record of 11,340 years. Asserting that no divinity appeared in human form again, they explained that the sun had changed it's position in the heavens four times {polar shifts}, that their 1st king was Menes,{=men=Mu=animal=animal men} & he was the 1st king to reign after the 'gods'. {ed. note. Dozens of 'paperbacks' are currently out with references in them on such applicable events of old...see catalog.}

ARE THERE OTHER LIFE FORMS ON EARTH THAT ARE OF INTELLIGENCE ?

When the exiles were placed on the planet they were energy without material form. They soon chose to enter forms that were of the most adaptable & capable types. On land the form prefered was the animal man or Homo Sapien. In the sea the form most preferred was the Dolphin family. Thus it happened that when the full use of 'MIND' was taken from the exiles, there were a certain number of them that were trapped in the Dolphin forms they were using at the time. Today there are a certain percentage of Dolphins who have very high intelligence levels, & who are in fact,exiles or 'originators' {originating the intelligence on this planet}. As in the case of our own species, the whole Dolphin group now carries a smaller degree of this long inbred intelligence. As certain primitive tribes of our own species finally have a trace of outside genetic stock of 'intelligence' mixed in with their own pure animal stock, certain Biblical prophecies now are now fullfilled. Such infusion of intelligence is necessary in relation to their making a final intelligent choice...a choice of whether they,as identities of animal man or dolphin background wish to reject or go further into the 'intelligen

WHAT OF THE 'BIG FOOT' & YETI WHICH ARE SO FREQUENTLY SEEN ?

The 'Big Foot' is a harmless creature of around a no.3 intelligence and was brought to this planet a little prior to the exiles. The Yeti is a similar type of species but with a slightly higher degree of intelligence. Both species were taken from environments where they had problems with the dominant races. On Earth they could better continue their anti social ways.

HOW WERE THE CYCLOPSE CREATED ?

They were created by a system similar to cloneing and from their youth they were subjected to intense conditioning & subjugation. It was their job to control the highbred 'nomes' or earth children & do what we call the 'dirty work'. When Shamballah lator fell, these Cyclops just couldn't defen themselves against the numerous nomes who so greatly hated them.

WHY DID THE EXILE KINGS USE CRYSTALS & MACHINERY WHEN THEY HAD THE POWER OF 1ST INSTANCE ENERGY CHANGE...OR MIND OVER MATTER ?

They actually didn't need the machines...but they soon prefered to keep their powers a secret & used the secondary energy conversion units to keep their subjects placated. After their powers were taken, the exiles were allowed just enough power to perpetuate their control of the planet but never the full useage of the power they once held.

WHAT CAUSES THE STRANGE EVENTS IN THE BERMUDA TRIANGLE ?

Some of the dissapearences are caused by the inversion capabilities of the so called 'Star Fire' crystals of legend. In an area long under the Burmuda Triangle there once existed a portion of ancient Atlantis. This are was the only area on the planet that contained these particular crystals.& they were of an element which acted as a neutral point between the third & fourth dimensions. The most minute amounts of solar rays reaching these crystals still allow them to de-materialize matter.

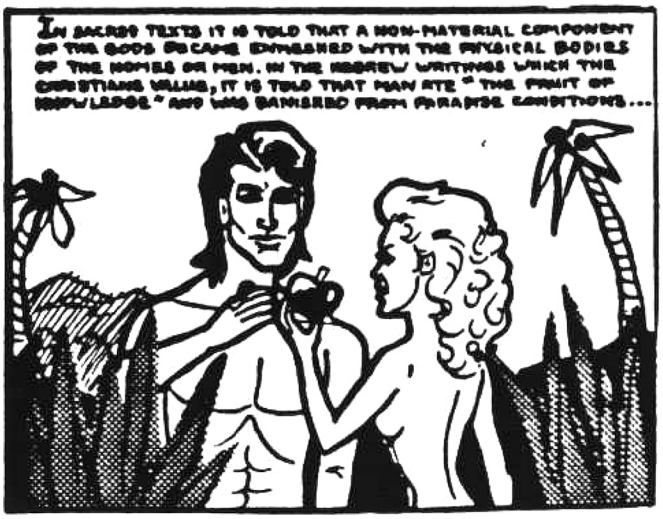
PARADISE OR EARTH

© 1981 Fry's, 22511 Markham, Perris, CA 92370

SUDDENLY, UNREAL EVENTS TOOK PLACE THAT ALTERED THE WHOLE LIFE SUPPORT PATTERNS OF EARTH. THE GIANT SPECIES OF ANIMALS AND HOMO-SAPIENS BEGIN TO DIE OFF, AND THE FIRST OF THE GREAT FLOODS WIPED OUT THE GREAT CITIES OF MEN...

A NEW SPECIES OF HOMO SAPIEN EMERGED IN ISOLATED AREAS OF EARTH. THEY WERE MORE INDEPENDENT AND DID NOT FIT INTO THE NORMAL TRIBAL LIFE OF THE ABORIGINES...



IN SACRED TEXTS IT IS TOLD THAT A NON-MATERIAL COMPONENT OF THE GODS ESCAPE ENTRAINED WITH THE PHYSICAL BODIES OF THE HOMES OR MEN. IN THE HEBREW WRITINGS WHICH THE CHRISTIANS VALUE, IT IS TOLD THAT MAN ATE " THE FRUIT OF KNOWLEDGE " AND WAS BANISHED FROM PARADISE CONDITIONS...

What is a good method of bringing about self knowledge or'awareness ?

A primary step in tapping in to your own knowledges, is allowing your various components to have an equal share in the work and play load.

To gain the higher levels of knowledge and power useage you must learn balance and control. Using your knowledge as a follower of domination priciples you will contend with restrictions imposed by higher level domination leaders & shortcomings. If you choose to act under a free choice motivation your concerns will center around ethical use of your knowledge ..under your own self control.

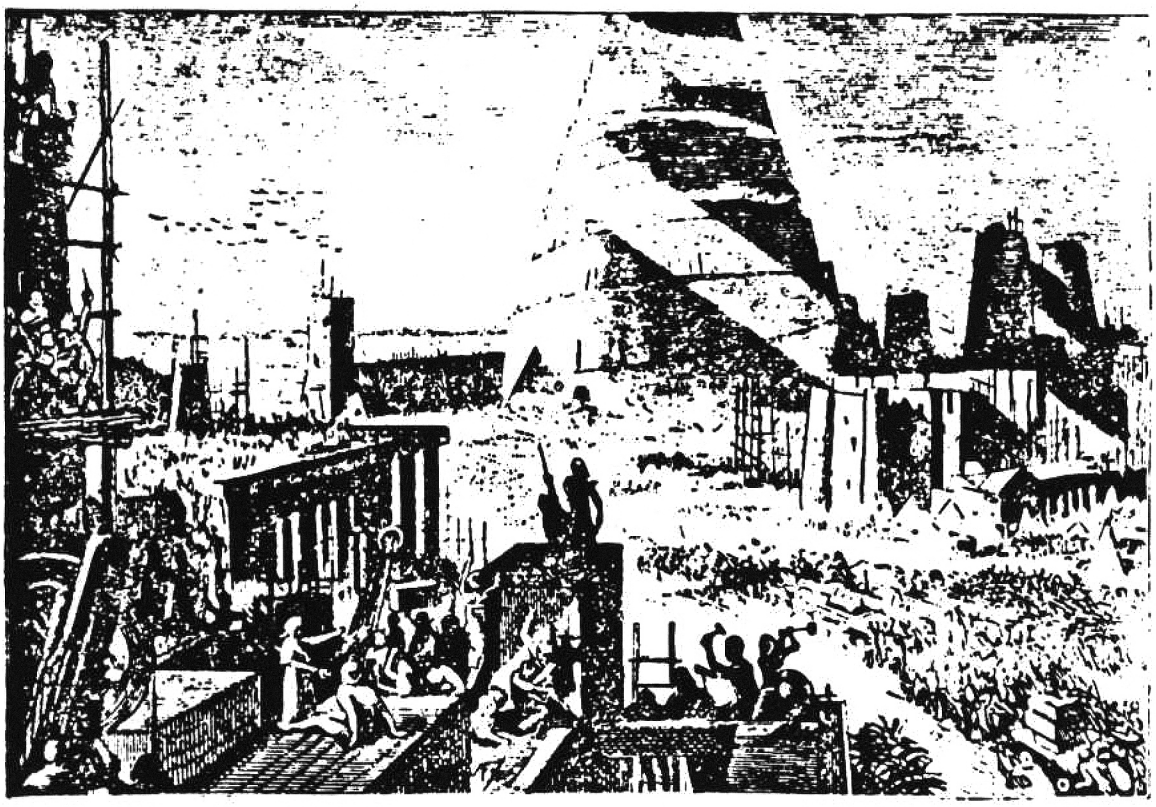
WHY IS THE BRAIN SO RELUCTANT TO ALLOW THE MIND TO HELP INFLUENCE US ?

Thousands of years of being tortured, abused, & miserable from a confused & vacillating intellect has taught the brain that such an intellect just can't be trusted. Believing in 'messias' & what has passed for spiritual things on Earth has all to often led to a life of deprivation and even martyrdom. This is just not in the interest of body survival. The brain then, has learned to reject most alien or unknown factors which might be a threat to the bodys well being. The mind & intellect are factors which the brain cannot reliably compute from material data. Being the computer of the body, it blocks out such potentially harmfull influences.

It often takes a great deal of effort to affect a working agreement between the brain & the mind, 'Talking to ones self' & making working arrangements through continued communication is usually necessary. The brain has the right to free choice & rejection of course, & this will require that a good case be made for allowing more 'flowline'. Continually ask yourself 'do I wan't this or not'. If your intellect doesn't, question the brains actions or reactions, and have another little understanding talk...

Where are the majority of men now in regard to 'awareness?'

The animal part of man is the brain, and it acts on an emotional level. The mind or real identity of man uses intellect. At this time ('73) around 70% of the population is at an Animal base level.



CHARITY

ABBOTT THAYER

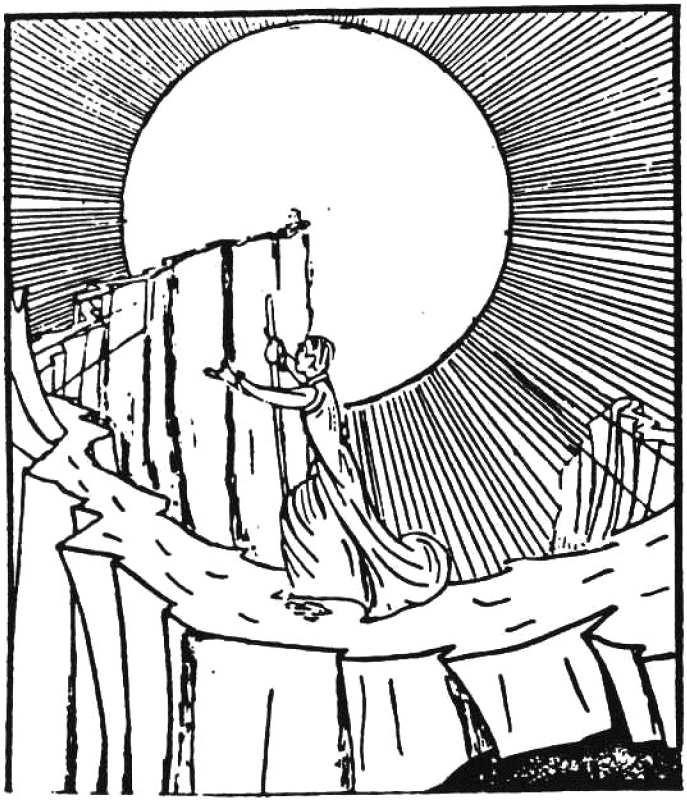
What is the major block against freedom? Fear. Two thirds of the things or goals that humans fail to accomplish are due to fear. Freedom to express one's self is given in the U.S. Constitution, yet today there are so many walls & restrictions around this right that fear stops the majority of persons from speaking out or getting to hear the truth. The smallest dog will often take on another animal many times its size WITHOUT the fear we know. Once accepted, the fear we are accustomed to can be RECOGNIZED as being USELESS to our survival... and it quickly goes away. Real SURVIVAL fear tends to raise the hair right up on the upper body extremities.

I refuse to fight in ridiculous wars, and it seems to me that Peace can come only through NON-violence. How can you justify fighting? By your actions, you are indicating that NOTHING is of value to you. If this is true, then why don't you give me all of your material goods & money?!Since you don't want to fight for the country that supports & sustains your way of life, then you do not deserve your Freedoms & Possessions. Persons with your attitude deserve NOTHING. Unfortunately, persons such as yourself are usually a DRAIN upon those persons of higher responsibility & deeper insight. War will end & peace will come... as soon as persons learn SELF-responsibility. And, with persons such as yourself around, it could be a long wait!

HOW DO I FIGHT FEAR ?

Fear is an important function of the brains survival mechanism. Under primitive conditions this fear of the unknown could be a vital & important protective feature. The common mistake is to make an excuse for fear. You can live with fear, but you should not live with excuses. Recognize your fear ,but don't let it stop you if you can see that the goal is worth the danger.

As your mind is functioning to a greater degree the fears begin to lessen. If you give allegience to the FREE system you will begin to know that you can defend yourself ..and this will aid you even more. Without the threat of loss or harm there will be little to sustain fear. Leaders who fear,or do not trust poeple, are of domination allegience. Someone who is truly Free doesn't really care who their associates or friends may support. That is their choice & in all actions he is beyond their control by his self choice & defence.

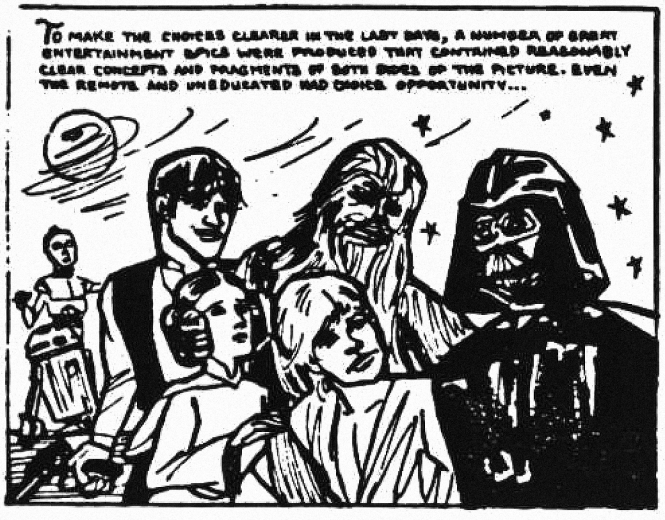


One of the human anti-matter components had a stored memory of what it felt like to be abused and dominated by others. If they inflicted such actions on others, they had to ignore and turn against their inner knowledge of ethics. During the training of humans in such knowledge, they were carefully monitored so that they did not blow themselves completely up. The animals around them were also monitored for genetic contamination...

In the final days of choice, the inhabitants of earth were given enough technology to make their long promised paradise a reality physically. It remained, however, for them to make the choice of how they used this technology...
BOOM!

All humans were subjected to pressures and tests in regard to their ethics, choices and progress to continue with their higher level components...

In the final days, those humans who refused to balance their various components and progress to a more perfect system would lose some components. The final choice was at hand...
STRIKE
HOW PAY
NO WAY!



To make the choices clearer in the last days, a number of great entertainment epics were produced that contained reasonably clear concepts and fragments of both sides of the picture. Even the remote and uneducated had choice opportunity...

A clear understanding of how the various human components functioned eventually came out as the modern human comprehension tests...

CRISIS in Mathematics

3-2-83

Dear Fry:

This past month discovered an extraordinary-signification in the triune-prime-arithmetic: MAXIMAL-PRIME-PACKING-GENERATORS for Induction-Coders, which in turn activate syzygies of a special-kind of gestalt of relatedness. More so, and to me at least, the all-important discovery in a new-math of a different kind or species that for the first time operates with gestalt-algebraic-symbols--no other 'math' today can handle gestalts of relatedness 'concepts', the old-eyed math is still binary and very primitive as to 'conceptualizations. The triune-prime-arithmetic employs General Semantic principles to a high-degree. The 2nd big discovery is the 'universal-concpet of IDENTITY-ACTION PROCESSES, i.e. where 'identity' exist and remains invariant to itself yet changed in its gestalts of relatedness via ACTION UPON ITSELF--truely an astounding discovery of vast implications.

Today I am somewhat crestfallen...with the new-developments in the prime-arithmetic of COMBINATORIC-PRIME-GESTALTS: it seems as-if the gestalt-properties increase at an exponential-rate, and more so, branching-off into infinities and unfolding new gestalt-properties without end, limitless, that is.

Jumping prime-universes and finding common gestalt-relationships can be a problem at times, for conditionalities are implied using gestalt-relationships among the 'primes' as such...more so, certain conditionalities bring about common-gestalt-relationships, other conditionalities none, and still other conditionnalities some among ranges of the prime-universes.

I have about 300-pages on the new-prime-arithmetic to date, but where it is leading to seems to be more uncharted-regions beyond shadowland-mathematics. The 'math' of today , sad to say, is very primitive-symbolism...

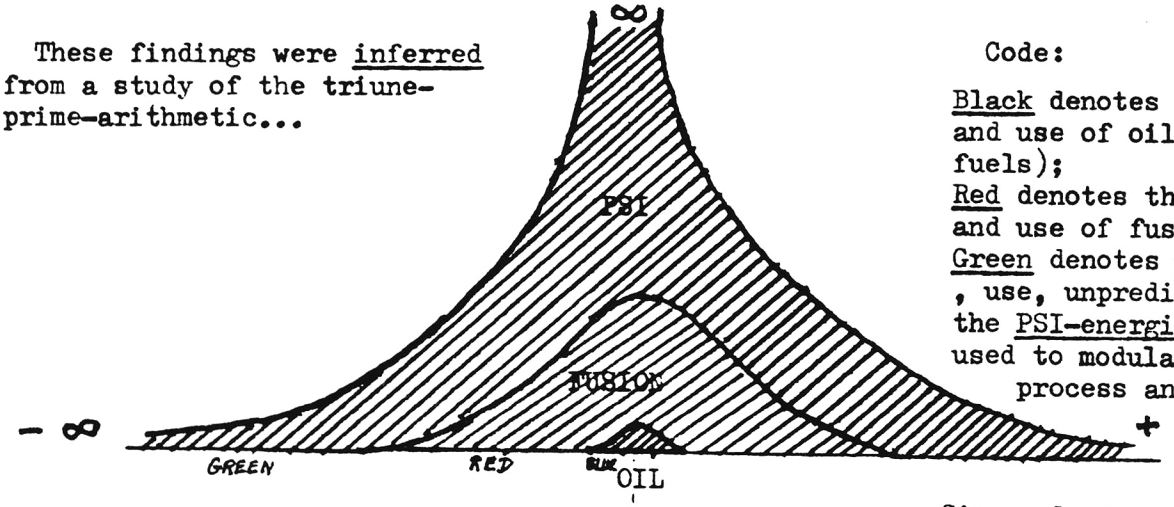
The triune-prime-arithmetic shatters like glass the entire binary-edifice of present-day math including 'computers'. The triune-prime-arithmetic has left me 'shocked' to the core and is taking me some time to get over the pre-conditioning of the old-eyed-math of the binary-type.

Perhaps the most extraordinary thing about the gestalt-prime-arithmetic appertains to a new-creative-principle employed for the first time, and it is: The design of new-symbols with new-properties to handle the ever-expanding gestalt-relationships. In the prime-arithmetic two kinds of primary-symbology exist, i.e. the unconformability-symbols used at the 'calculation-level of abstraction, then the conformability-symbols designed and formed to handle the gestalt-level of symbolism(a higher-order of abstracting using General Semantics).

At the gestalt-level of abstracting, the whole-is-greater than the sum of its parts.

Herein is enclosed a graphic on the astounding extension of energy-concepts of a new-order of awareness or existence, so vast as to leave the imagination challenged as never before within the physical-realm via inputs coming from the inner-realm(energy-concepts).

These findings were inferred from a study of the triune-prime-arithmetic...



Code:

Black denotes energy-extent and use of oil-energy(fossil-fuels);
Red denotes the enormous extent and use of fusion-energy;
Green denotes unlimited-extent , use, unpredictaibility using the PSI-energies: psi-energies used to modulate the fusion-process and beyond, etc.

Sincerely Yours,

George L. Brandes

Keys To Superhuman Ability By A.H.Fry

The basis of superhuman action comes from the controlled use of a special body energy. This energy is used by all animal species for survival,UNKNOWINGLY. We humans are the only species that can put this psionic or eloptic energy to use knowingly. Sages, saints,mystics and magicians have tapped this energy to work miracles from the dawn of history. Why we are struggling along with 'dead end'mechanical systems that are inferior to mind over matter useage,is a puzzle to many 'visitors' to our planet. That something so natural and easy to work with has been made so mysterious and confusing is a reflection on how well our domination & denial systems have kept us mentally enslaved.

To understand the principles involved in directing eloptic energy,it is necessary to understand that we humans are an assemblage of several components. Most humans have at least three Minds..and it is these minds who know how to extract and entomb the bodys energies. The body can be totaly exhausted and if one of the Minds is suddenly motivated to start a new project or have some fun,it can suddenly get rejuvinated. This phenomena happens constantly but is totaly unrecognized.

The new concepts concerning cryogenics (freezing a body for later) is based on a mind awareness of this energy storage. The finer mechanics & ignorance of the higher level human components make this another 'dead end' system however.

Eastern cultures have long known of the flows of eloptic energy through the body. Acupuncture charts show some of the circuits.This technique simply short circuits these energy flows at various points. Our mechanistic science has long ignored such aeas.The flow atoms are not the usual electrical atoms,so are not easily measurable on the usual machines. The human Mind that functions on this energy flow is also unrecognized by todays sciences. It is the life force atoms of this energy that pulls the blood flow through the body. The arterial flow is very crude compared to these eloptic energy flow systems. The Orientals who are ware of these flows have unfortunately added to the confusion by creating complex systems of tapping these energies. "Kundalini' is a typical concept that is based on abstanance. It is a system that forces undisciplined persons into a step by step concentration. Such a body denial system is actually not necessary ,but by such mechanics & ritual the students are forced into greater concentration. It is this concentration that is the key. Persons in our culture are so filled with Mind chatter or scattered mind thought flow, they seldom concentrate on anything more than a few seconds. The thousands of systems dreamed up have usually worked to some degree simply because they cause a greater flow of eloptic energy atoms to be directed toward a particular goal. Few persons are interested enough in giving up their favorite concepts or brainwashing to get down to the basic elements of anything. The planets domination & denial systems have them firmly entrapped. Even in learning some complex Mind control system, they must give allegience or money to some outside influence. This despite the fact that most of the great teachers insisted that the awareness was to be found in knowing ones self. Yes, the simple fact is, that anyone can use awsome mind over matter abilities when they know enough. Without complete self control and discipline however,there can be problems. Spontanious human combustion is an example of what can happen when emotionally actuated energies conflict and short circuit.

As a protection energy, the eloptic energy can easily be put into place with no danger or effort whatsoever. Animals who ordinarally feed on each other can sleep side by side when they unconciously put up this energy shield. A human can use simple mind switching techniques to be virtually 'invisible' and unharmable with such shielding. Marshal arts lore mentions this as the 'golden bell' cover etc.

In the mid 70's a man who had complete control in these areas put out foundation material called the Modern Humans Comprehension texts. Later,some of his conversations on using eloptic energy in self defense was put into book form. Persons interested may write; Modern Humans at 22511 Markham,Perris,CA. 92370 USA

Just think what would happen if High Frequency Static Electricity was used on the Sonic Resonator! WOW! Not only that! but if the Sonic Resonator was activated over a grid point, we would create a triple doorway leading into another time dimension!

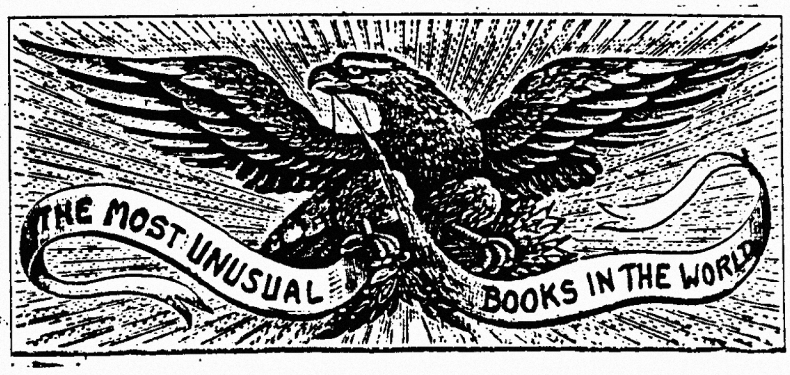
To sum up this article, the Unified Principle which holds together the fabric of our Universe is PHI or I.618. By examining the previous diagram we will find that Gravity is directly related to this number. It is interesting to note, that whenever the PHI value is used in constructing an object of any type, a time distortion occurs, either inside of the object or close to it. So there you have it, the theory behind AC/DC.

Steven Gibbs

Because time is only an element of this physical dimension of ours influences that come from realms beyond this dimesion are confusing in their freedom from this limitation. Throughout history there have been persons who were able to escape time for a brief period through mental means. yet it has only been recently that the technology for doing so physically has been available.

The so called 'Philadelphia experiment' after WWII was the Ist physical step. The U S Navy space warped a destroyer escort ship from their naval yard to Norfolk Virginia & back again. Since this experiment,the government has done it's research under high security and the public has heard little outside the concepts cranked out by futuristc movie makers. Many feel that the teleportation machines of 'Star Treck' & other vidio offerings are generally available & only being with held from use by a system dependent on absolute control & financial gains. When teleportation can be strictly controled it will be made available.

'81' — Effy —



Al Glaser of Riverside holds a copy of his newspaper format "novel" which he sells for a quarter in newspaper racks on street corners.

The "How to Survive a Depression" news novel is an opinionated, philosophical tract on the history, causes and prevention of economic depressions and on what can be done by the individual hard-pressed to stay alive during one.

Glaser and Alson Fry of Perris each wrote half of the two-part treatise with each of their sections under their own names.

"Dawn at Twilight," at 150,000 words, covers 23 regular newspaper-size pages of solid type. It is set in the future when the women of the world revolt, arm themselves and set out to take away all arms from men so there can be real peace. It has a "1984" flavor and setting.

CAN'T brainwashing, most paranormal abilities s simply to much to accept. There simply isn't anything in their schooling and experience to support such a concept. For persons who must have everything down in black and white blueprints, there is a work which does show exactly how the human components can travel mentally or physically to other areas or time frames.....

A.B.Glaser was able to instantly go to virtually any area of the planet to gather information. He also sometimes went beyond the planet to gain information. It was very simple for him and with an astonishing simplicity, he produced a work showing how the Atoms of the various Minds or human components were linked together. Once a person could balance their components and learn the required 'inner' cooperation, time and distance was no barrier. On page 61 of Glasers Modern Humans Comprehension course #4, you can see how the Kinetic energy given off by the Soul Life Atom does this Earth tripping work within simple LAW. This work is virtually the only text to ever get down to such basic Atomic structure levels to reveal how the body can transcend the usual physical laws. Comprehended, you will find out why most persons are blocked in their super normal abilities...and how such blockages can be lifted. For many years I saw Glaser put into practice the same miraculous performances attributed to Jesus & great Avitars. As his Earthy mission came to a close, he decided to give humanity the blueprints to such power and ability. If you are reading this report I suspect you are ready to rise above the usual levels of just existing like some slave on a treadmill. You are probably ready for freeing yourself and assuring your survival for the rest of eternity. If this is so do yourself a favor and look into Glasers 'Comps'...

If the Comps are outside your budget at the moment it is recommended you get a copy of "Earth Report" or 'Total Self Defense" ($20 ea) Both give deep insights into Glasers knowledges and your potentials.....

UNDER WRAPS and awaiting future publication are some expose type things which Glaser says will be published anonymously because the authors are afraid to say what they know in public. Glaser expects trouble from these new "novels" and, also, good sales.

"There are some things we have here that are highly explosive and I'm sure we're going to run into trouble," he said, with relish ⊗

He selects pieces for his new medium on the basis of the "merit of the story."

"As long as it's interesting to a broad segment of the population, I'll publish it," he said.

Truth also will be a criterion.

"I like the truth, the writer's true not sham and malarky. It doesn't have to be a truth that anybody else will believe."

His "news novel" format is not a new concept, he said, but a return to the earliest style of newspapers. Near the turn of the century, newspapers carried serialized works of fiction, he said, and many of the "classics" first appeared in newspaper or tabloid form, he contended.

HOW DOES GLASERS WORK COMPARE WITH OTHERS LIKE PERCIVAL, MAX LONG, URANTIA & OAHSPE ?

Answere by Fry. To begin with Glaser didn't depend on older books to get his knowledge. Most history & philosophical works are simply borrowed rehashes of older works. (his-story) Glaser tapped in to the specific components he wrote about and got 1st hand knowledge. He could also go to the so called Akishic (other dimensional repository) records if he required historical data. I was frequently amazed when I saw him do this in front of me in a matter of seconds. In the 'Comps' the keys to how such things can be done through balance.

Percival had some of the picture when he advocated getting the 'thinker' and the 'doer' working together. Without a detailed knowledge of how these components interreacted together it's next to impossible to apply such principles. I got excited when I discovered Percivals work many years ago, but never could get results. Like Max Longs work, you can see what the higher overall picture is & what the authors were covering only after you get the 'Comp' background.

Longs Huna books are very helpfull and true to principle as far as they go. It's just that the high & low selves are detailed out so much deeper in the Modern Humans Comp 2 text.

Urantia is the work of followers of a parrallel system to that of the 'Father' (Creator) mentioned by Jesus and others (He never used the term god). These beings are not really aware of the 'flow lines' beyond their own. While their goals of a 'paradise' are lofty, it is only one of two options. A long tale... Comp students can recognize both systems and make a valid choice knowingly.

"Oahspe" is a rather antiquated historical work for the most part. It's interesting and has a kindly philosophy, but completely ignores the great brain alteration events which so altered the course of humanity (Garden of Eden)

Like so many other well meaning philosophical & religious works, it leads the reader no where practical.
